

Freedom to Innovate

Lucy is a powerful AI-driven platform that brings together Smart Buildings, Facilities Management, IoT, and Business Processes into a single, easy-to-use tool to make all Workplaces Smart and Sustainable.

The Lucy Matrix

From our 20+ years of discussions with clients and partners, we see this Matrix as the starting point for any organization's journey towards a Smart and Sustainable Workplace.

Composability

Composability is at the core of the Lucy Platform.

In a world where businesses must constantly adapt, Lucy lets you build sophisticated solutions from pre-built blocks, like legos. You can then use these blocks to compose the outcome you need much faster and at a fraction of the cost.

Energy

Achieve your sustainability goals by tracking energy consumption and other related metrics.

Automation

Lucy's workflow automation tools lets you integrate multiple applications and devices in minutes.

Outcome

In today's world, the Workplace must bring everything together, whether you're at home, at the office, or on a beach in Bali.

Lucy empowers all your devices and software to speak to each other to provide you the information you need in a single place.

Smart. Sustainable. Simple.

Experience

Lucy's dashboard creation tools, together with the employee experience mobile app, gives your users and tenants easy access to information and services for an enhanced experience.

Productivity

Lucy integrates to all your common workplace applications. Be more productive by bringing all your tasks and calendars in one place.

AI & Machine Learning

Lucy uses AI so you get what you need faster.

Simply ask Lucy for the information you need and it will provide it to you in a simple and structured manner.

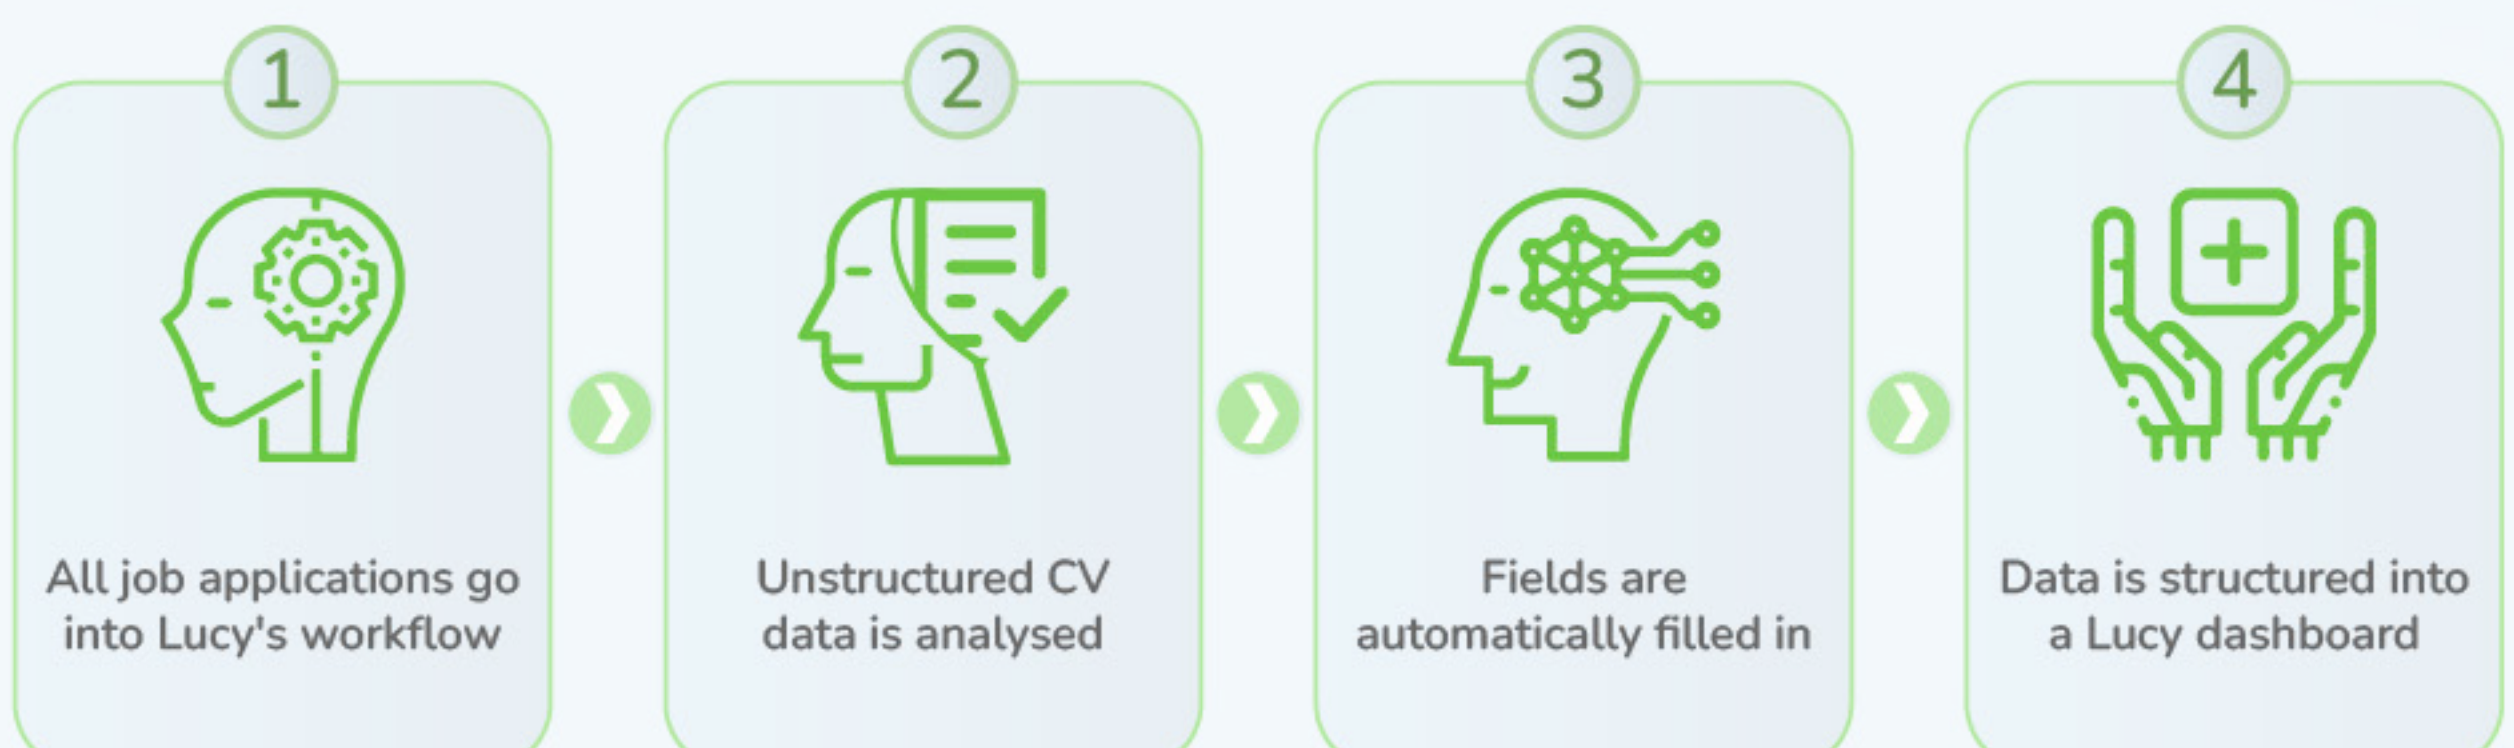

It will even design the dashboard components for you.

Your Workplace just got Smarter.
