

**BRINGING YOU 20+ YEARS
OF FACILITY MANAGEMENT
INDUSTRY EXPERIENCE**

OUR CUSTOMERS

A Simple, Affordable, and Field-Proven Maintenance Management Software.

iviva.facility is an all-in-one Facility Management, CMMS (Computerized Maintenance Management System) and CAFM (Computer-Aided Facility Management) platform; a simple yet scalable software designed to streamline maintenance operations, efficiently manage teams, and help elevate staff satisfaction.

The iviva.facility is ideal for organizations wanting to digitize manual, mundane tasks and processes.

SCALABLE & AGILE

Ability to **handle simple and complex operations** alike. Expand fast as you grow.

MINIMAL TIME TO VALUE

Embedded domain knowledge; no Facility Management expertise required to set up. Realize benefits immediately

AFFORDABLE, REGARDLESS OF YOUR ORGANIZATION SIZE

Fixed per-user price; includes all features without limitations.

UNPARALLELED SUPPORT

VIP customer support, at no extra cost. Assisted on-boarding process. Dedicated account manager.

20,000⁺
Users

4,500⁺

130,300⁺
Assets managed

iviva.facility packs everything you need to run your maintenance operations with

No transaction limits | No implementation cost

Monthly
Subscription Of Only

25 USD
per User

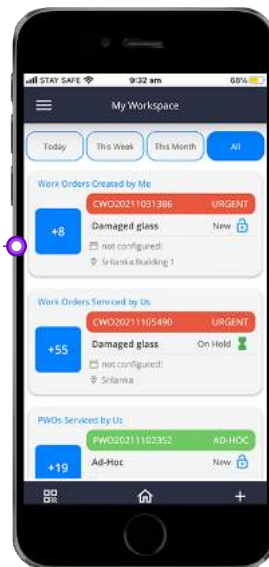

PORTALS, DASHBOARDS, AND WIDGETS

iviva.facility provides a set of user experience portals and dashboards with user interactions based on your organizational responsibilities and job roles. The collection of widgets in the user experience portals and the dashboards showcase your summarized

information and exceptions related to your organizational operations. This will give you a clear insight and pave the way for you to make right decisions and take correct actions on time.

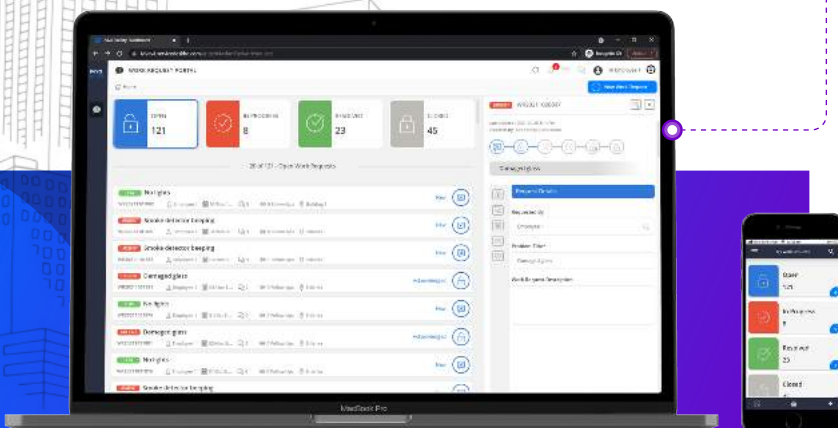

UNLIMITED CORRECTIVE WORK ORDERS

Manage and track work orders, labor, parts, performance and expenses; analyse daily, weekly and monthly data to make improvements, and control labor & maintenance costs. Auto assign work orders to service providers, supervisors and technicians.

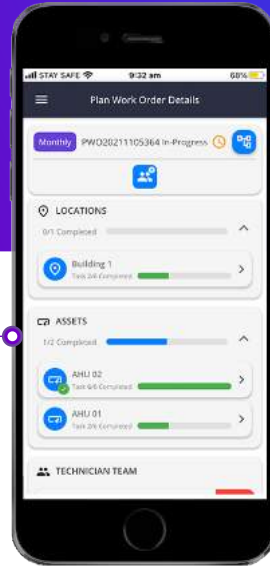

UNLIMITED WORK REQUESTS

Staff can create Work Requests (WR) independently. Seamlessly connect WR with Work Orders (WO). Automated updates to requesters based on WO status changes. Collect ratings and feedback on completed work.

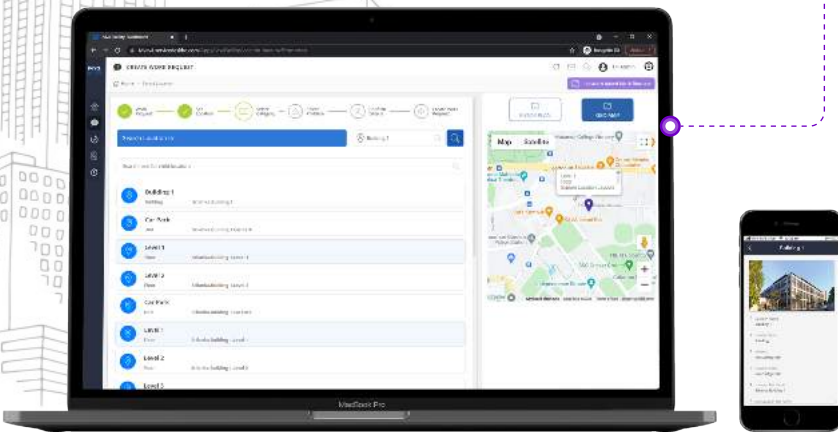

PLANNED MAINTAINANCE

Keep track of routine maintenance and reduce downtime, unplanned equipment failures, and extend the life and reliability of your equipment/assets. Schedule service audits and equipment/asset-inspection-related tasks.

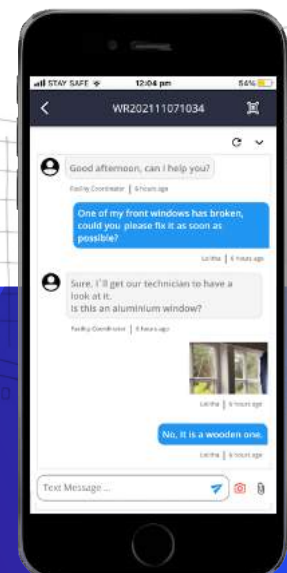

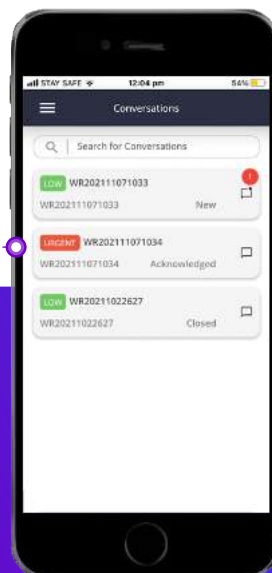

LOCATION REGISTER

Manage your sites, building locations & spaces and specify location hierarchy. Maintain detailed logs of active repairs & repair history, PPMs, and audits of each location.

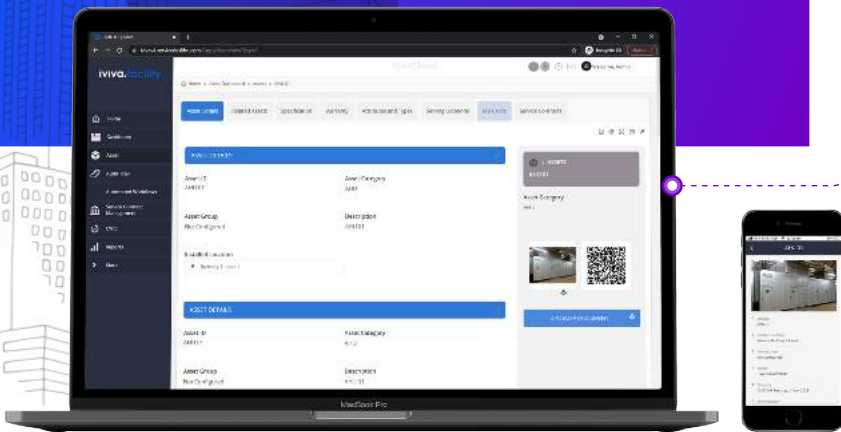

TRANSACTION BASED CONVERSATION

Improve communication between team members who are actively involved in resolving issues or performing preventive/corrective tasks.

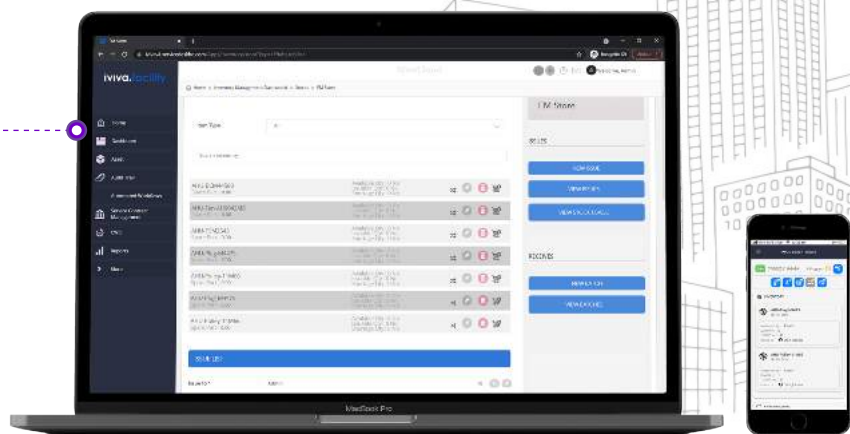

ASSET REGISTER WITH UNLIMITED ASSETS

Record critical asset data such as warranty, insurance, depreciation, repairs, downtime, etc. Automatically associate maintenance work (Corrective Work Orders, PPM) with assets.

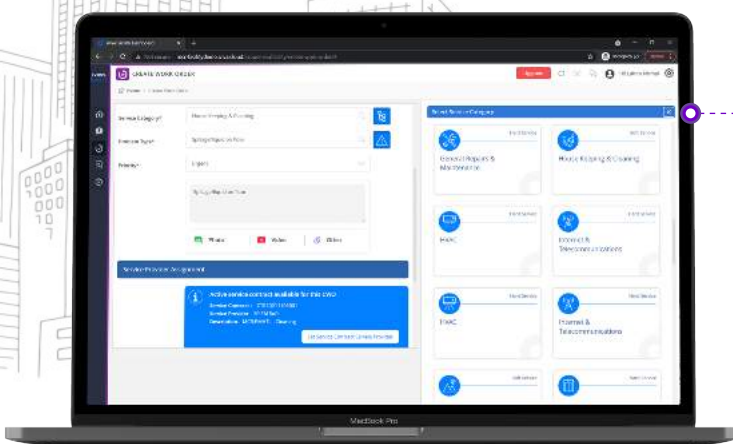

INVENTORY MANAGEMENT

Streamline inventory management process and avoid overstocking/understocking. Plan supplies with the support of re-order thresholds. Keep records of inventory items issued to manage Corrective Work Orders.

SERVICE PROVIDER AND CONTRACTOR REGISTRATION

Keep records of all your service providers and service contracts in one place. Track vendor performance, warranty contracts and ratings across your service providers.
