# Smart BIM Solution

Smart Building Information Modelling (BIM) optimises energy consumption, enhances occupant comfort/safety, streamlines maintenance operations, and improves building performance. It can help achieve up to 30% energy savings via sustainable practices, and can be applied to various building types. Its advanced IoT technologies enable informed decision-making, reduced costs, improved productivity, and enhanced sustainability.

View asset information in 3D

View and control equipment with real time data

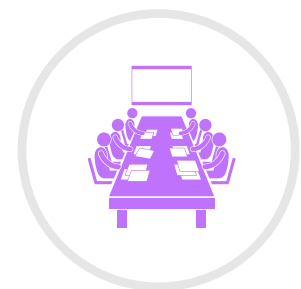

Navigate to problematic assets

Create tickets, view work order locations, PPMs and resolve FM based tickets

View/check incidents with CCTVs in close proximity to incident location

Book meeting rooms/seats

Did you know, according to a report, the global BIM market size is expected to grow from \$4.9 billion in 2020 to \$8.8 billion by 2025, at a CAGR of 12.5%?

## Third Party Integrations

With Lucy, our no-code smart workplace design platform, this solution can seamlessly integrate with third-party products and software.
